Lancaster, PA

 /SreevardhanGullipalli

Summary

- Mechanical Engineer with 4 YOE in mechanical design, parametric CAD modeling (SolidWorks, GD&T), and FEA (ANSYS), with experience in full-cycle project execution for custom-engineered solutions. Experienced in fast-paced, engineer-to-order environments
- Open to immediate relocation. No reimbursement necessary.
- Authorized to work in the US on H-1B visa

Experience

Jaydu LLC - Consulting Engagement at Utilimaster, Lancaster, PA

Mechanical Design Engineer

June 2024 - Present

- Developed comprehensive 3D CAD models (SolidWorks) and detailed production drawings incorporating GD&T (ASME Y14.5) for complex mechanical systems and assemblies. Applied DFM/DFA principles extensively and validated physical prototypes to ensure successful full-scale production.
- Conducted comprehensive Structural and Thermal Finite Element Analysis (FEA) using ANSYS to validate the integrity, performance, and safety of critical systems under diverse static and dynamic load conditions.
- Re-engineered multi-component mechanical assemblies to reduce part count by 20%, enhance manufacturability. Achieved documented cost savings of \$5000 /unit.
- Spearheaded design standardization initiatives, systematically organized and documented large CAD databases to improve design reuse and streamline future development cycles.

Jaydu LLC - Consulting Engagement at Masterack, Kansas City, MO

Mechanical Design Engineer

June 2021 - June 2024

- Led New Product Development initiatives from concept to production for specialized vehicular accessories and modular systems, including ladder racks, configurable shelving, and access solutions.
- Executed detailed structural FEA (ANSYS) to assess and validate the load-bearing capacity and structural integrity of key components for cargo management systems, ensuring compliance with safety and durability standards.
- Oversaw the complete Engineer-to-Order (ETO) process for custom client solutions in a quick-turnaround setting, effectively translating unique customer requirements into robust, production-ready designs.
- Engineered and finalized comprehensive manufacturing drawing packages; facilitated cross-functional design reviews with engineering, manufacturing, and stakeholders to secure approvals and optimize for assembly.
- Executed design optimization projects to reduce part count, reduce material wastage and allow for quicker assembly.
- Participated in Lean Manufacturing activities. Designed carts, jigs and fixtures to standardize installation process and improve quality of production.

Education

MS, Mechanical Engineering, University of Illinois Chicago, Chicago, IL

May 2020

GPA: 3.75/4.0

B.Tech, Mechanical Engineering, CMR College of Engineering and Technology, India

Jun 2017

GPA: 3.6/4.0

Skills

- **Design & Analysis:** SolidWorks (Advanced), Autodesk Inventor (Proficient), Siemens NX, GD&T (ASME Y14.5), Large Assembly Management, Technical Drawings, Windchill, ANSYS (Structural, Thermal, Modal), FEA (Static, Dynamic, Modal)
- **Engineering:** DFM/DFA, Sheet Metal Design, Extrusions, CNC Machining (Knowledge), Injection Molding (Knowledge), Tolerance Analysis, Cost Optimization, Hands-on Physical Prototype Development & Testing, Design Verification & Validation (DV&V), New Product Introduction (NPI)
